EU RoHS Declaration of Conformity

Thinklogical certifies that the restricted material content for all products do not exceed the Maximum Concentration Values (MCVs) set by the European Unions Restriction on the Use of Hazardous Substances (RoHS) directive, 2002/95/EC and its most recent amendment, 2011/65/EC.

Thinklogical uses certain restricted substances in amounts that may exceed the MCVs when technically necessary. These applications are allowed under exemptions in the recent amendment 2011/65/EC. The main exemption is lead used in solder (exemption 7b). Other parts in products may be exempted by 6a, 6b, and 6c.

Whereas products are declared to meet RoHS requirements by Thinklogical as Thinklogical currently understands the Directive's requirements. Thinklogical has an internal system to verify conformance with all applicable requirements and to the best of Thinklogical's knowledge, the information is true and correct.
