

Installing HDMI Cable Retainers on TLX Extenders

Thinklogical HDMI Cable Retainers are designed to keep your video cables installed securely in their devices. Easy to install, easy to remove, it's the logical solution.

Each Cable Retainer kit (KIT-000069-R) includes:

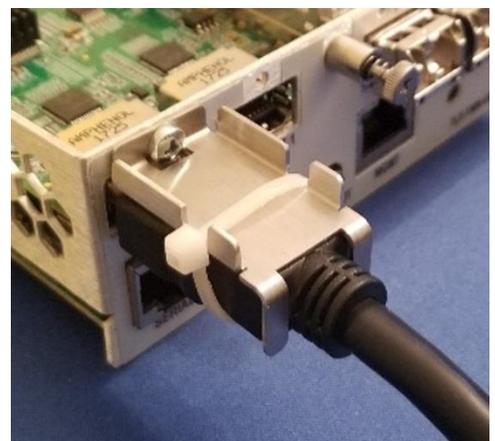

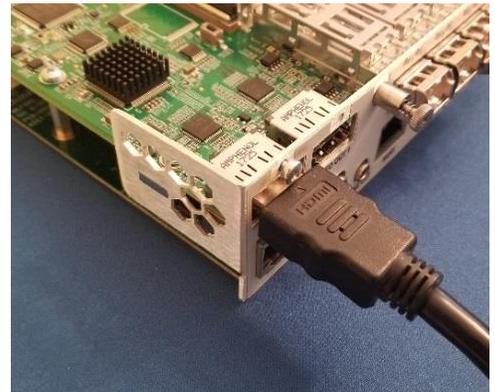

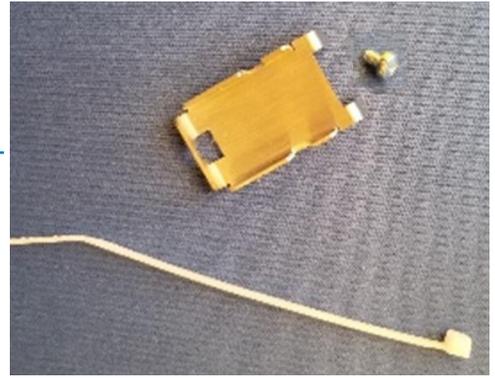

- 1 - M3 x 4mm Screw
- 1 - Cable Retainer Bracket
- 1 - Nylon tie-wrap

Step 1: Install the screw into the panel just above the HDMI cable connector, leaving enough space between the screw-head and the panel to allow the bracket to slide between them.

Step 2: Install the HDMI cable into the connector.

Step 3: Install the Cable Retainer Bracket by sliding it over the screw and against the panel until it is fully seated above the cable. Tighten the screw.

Step 4 (optional): Install a Nylon tie-wrap as shown.
