HAPPY THANKSGIVING

FROM OUR FAMILY TO YOURS: Giving Thanks

Here at Thinklogical, we have a lot to be thankful for this year. We launched the [TLX1280](#), the industry's largest and most advanced 1280 x 1280 port 10G matrix switch; the Thinklogical team met customers and partners at more than 70 industry events worldwide; and we continue to innovate and offer new product solutions such as the [Integrated Client Transmitter](#). However, we are most thankful for the community of customers and partners we have the opportunity of working with every day. We could not have had such a successful year without you. Thank you for your dedication and loyalty to Thinklogical and please have a wonderful holiday!

NEW C2 FACILITY IS DLA's "NERVE CENTER"

PROUD TO SUPPORT THE MISSION

We are proud to support the mission of the U.S. Defense Logistics Agency (DLA) and their new Agency Synchronization Operations Center (ASOC) that opened on November 6, at the McNamara Headquarters Complex on Fort Belvoir, Virginia. The new state-of-the-art center fuses mission readiness and business operations to better operationalize and integrate the agency's support to warfighters and federal partners. The ASOC is being called the "nerve center" of the agency and an extension of the DLA Readiness Dashboard, which collects real-time data to help measure the agency's impact on military weapons systems. Solutions from Thinklogical, Cyviz and Evans Consoles are deployed in the ASOC to create a highly-efficient and flexible command and control architecture that delivers "a capability we did not have before," according to the agency's director. **READ MORE...**
