A BELDEN BRAND

NOW AVAILABLE: VIRTUAL DEMONSTRATIONS & ONLINE TRAINING

LEARN ABOUT THE LATEST FEATURES AND CAPABILITIES: Live and On-Demand

With travel restrictions and social distancing still required for many areas, we've updated our Milford center to allow online product demonstrations and stay connected with our customers and partners. This new capability allows you to schedule an interactive, one-hour session with one of our experts and learn about our latest product innovations, demonstrated in an actual multi-desk operations control room. To schedule a demo, contact your Thinklogical account manager or visit our website. [LEARN MORE](#)

John Russell
Training

Tech 100 and NEW Tech 151 Online, On-Demand Training Stay current with your AV skills with our online training classes, available on-demand from the comfort of your home or office.

The Tech 100 online course provides an introduction to audio visual basics and KVM (keyboard, video, mouse) technology, and is a prerequisite to our advanced 200 and 300 level instructor-led classes. Eligible for 6 AVIXA CTS RU credits

Our new Tech 151 course is a modified, online version of the Tech 200 class. This course offers an overview of the Thinklogical TLX 10G product line and a detailed breakdown of our system management and control software SMP/SMP2 - System Management Portfolio. Not eligible for RU credits. [LEARN MORE](#)

ENHANCING MISSION READINESS AND SITUATIONAL AWARENESS

NEXT-GENERATION INFORMATION SYSTEMS FOR NAVAL SHIPS: New Application Brief

thinklogical
NEXT-GENERATION INFORMATION SYSTEMS FOR NAVAL SHIPS

ENHANCING MISSION READINESS WITH IMPROVED INFORMATION ACCESS
The proliferation of multi-domain intelligence, surveillance, and reconnaissance (ISR) information has changed the landscape of naval strategy planning. Real-time analysis of ISR information has enhanced the team's well-timed and accurate decision-making. Understanding modern warship info feeds collaboration platforms better able to support dynamic mission requirements.

WHAT IS THE CHALLENGE?
The video and data distribution infrastructure technology used in ship's Combat Information Centers (CIC) and Integrated Weapon System (IWS) rooms has not kept up with the expanding information-driven naval mission. Next-generation, fiber-optic naval CIC and IWS systems based on Thinklogical video and KVM distribution technology results in multi-function operator consoles that support multiple classifications and seamlessly connect to the combat management system, the IWS, and all other computer and information systems on board, including the bridge. Read our application brief to learn more. [DOWNLOAD](#)

THE THINKLOGICAL SOLUTION
Next-generation fiber-optic naval CIC and IWS systems based on Thinklogical video and KVM distribution technology results in multi-function operator consoles that support multiple classifications and seamlessly connect to the combat management system, the IWS, and all other computer and information systems on board, including the bridge. Read our application brief to learn more. [DOWNLOAD](#)
