INFOCOMM 2019
GET INSPIRED: June 12-14, 2019, Orlando, FL

Are you addressing tomorrow’s challenges with yesterday’s technology? Don’t be left behind! Join
Thinklogical at InfoComm 2019 in Orlando, June 12-14, at booth 2561 in the West Hall level 2 to
experience how our latest secure signal management technologies enable instant situational awareness
and improved collaboration, allowing for rapid decision making. See live demonstrations of our IA-
accredited video distribution & KVM extension and switching solutions for government, defense and
intelligence command and control/C4ISR, intuitive dispatch systems for public safety and reliable and
resilient operation centers for energy and utilities. Our live demonstrations include:

- The new TLX1280 - the industry’s first 1280 x 1280 10G matrix switch. Standing 42RU tall, the
  TLX1280 features a 32-port input / output SFP card providing 10Gbps uncompressed bandwidth
  per port. As with all Thinklogical matrix switches, the TLX1280 is completely non-blocking and
  protocol agnostic, and is designed with hot-swap components for maximum reliability and
  redundancy in 24/7 operations.

- The award-winning all-in-one solution for VDI and remote computing - the Integrated Client
  Transmitter module combines a full-featured Intel processor with a high-performance KVM
  extender. Eliminate the need for a separate zero/thin/thick client device in VDI and other remote
  computing applications, and save a minimum of 50% of valuable rack space.

- TLX uncompressed 4K video and KVM extension and switching, supporting 4K and Ultra High
  Definition (UHD) video at up to 4096 x 2160 resolution, 4:4:4 color depth, 30-bits per pixel at
60Hz frame rate, using only two-fiber optic or CATx cables. TLX extenders support HDMI 2.0 and DisplayPort 1.2. TLX matrix switches are scalable from 12 to 1280 ports.

- **System Management Portfolio 2 - SMP2** provides powerful remote management and maintenance capabilities, making it easier for users to configure, operate and update Thinklogical signal extension and switching systems of any size.

**NEW! THE INTEGRATED CLIENT TRANSMITTER FOR AMULET HOTKEY**

**FULL-FEATURED RACKMOUNT PCoIP ZERO CLIENT & KVM EXTENDER IN ONE MODULE**

---

Introducing the all-in-one solution for Amulet Hotkey! Create a more secure, productive and high-performance remote computing infrastructure using the new all-in-one rackmount Integrated Client Transmitter extender supporting the Amulet Hotkey DXR-Z4 PCoIP Zero Client.

The Thinklogical Integrated Client Transmitter for Amulet Hotkey DXR-Z4 host card is a full-featured fiber-optic KVM (keyboard, video, mouse) extender combined with the Amulet Hotkey DXR-Z4 zero client, based on the Tera2 PCoIP chipset. This unique integrated module saves rack space, reduces heat, noise, cabling and power requirements.

Together, Amulet Hotkey and Thinklogical enable the only NATO Certified, multi-domain extension and switching solution that supports the Teradici PCoIP architecture. When deployed together, users can now achieve an end-to-end Information Assurance (IA) Accredited video distribution infrastructure while benefiting from a 50-80% reduction in deployed rack space. ICYMI: WEBINAR ON DEMAND
ACHIEVING INSTANT SITUATIONAL AWARENESS IN SECURE COMMAND & CONTROL ENVIRONMENTS

Did you miss the SIGNAL webinar on “Achieving Instant Situational Awareness in Secure Command and Control Environments”? No problem, you can now watch at your own convenience from anywhere, on any device!

During the webinar we broke down the necessary requirements for obtaining immediate information access and improved operational efficiencies with a next-generation command and control system.

Also, Thinklogical adviser, Admiral Michelle Howard (U.S. Navy, RET), shared her personal experiences on the value of quality data and how it contributes to situational awareness from the command perspective. WATCH NOW...

AVID PRO TOOLS | S6 AUDIO CONSOLE & THINKLOGICAL
NEW EUCON SOFTWARE RELEASE SUPPORTS THINKLOGICAL KVM SWITCHES
Audio mixing and post-production are key components of content creation, and Avid’s Pro Tools software and S6 control surface console is a leading toolset for creative professionals. Now, Avid has announced support for Thinklogical KVM switches with its Pro Tools | S6 Console via its new EUCON software release.

The new release of EUCON provides S6 users with Ethernet control, dual monitor switching and source and destination naming of Thinklogical KVM matrix switches, delivering a more productive audio mixing workflow.

EUCON 2019.5 is available now from Avid as a free update for Pro Tools | S3, Pro Tools | Dock, Pro Tools | Control and Artist Series control surfaces, and to Pro Tools | S6 customers on valid support contracts.

View the Avid EUCON press release: https://www.avid.com/press-room/2019/05/eucn

**SOFIC 2019**

**NEXT GENERATION COMMAND & CONTROL**: At the Heart of the Mission

Join us at The Special Operations Forces Industry Conference (SOFIC), the premier conference for the SOF community to interact with industry and to collaborate on the challenges, initiatives and way-
ahead in delivering the most cutting-edge capabilities into the hands of SOF operators. Learn the latest in next-generation command and control solutions and how to manage multiple classifications through one IA-accredited video distribution switching system. **Booth 1947. REGISTER TODAY...**

**2019 EVENTS**

**JOIN US : On the Road**

Save the date and join us as we take our products and experts on the road. We’ll be bringing our latest secure signal management innovations to each of our shows. **Schedule a one-on-one meeting.**

**NITEC - May 20-22, 2019 - Oslo, NO**

**SOFIC - May 20-23, 2019 - Tampa, FL**

**CYCON - May 28-31, 2019 - Tallinn, Estonia**

**InfoComm - June 12-14, 2019 - Orlando, FL**

**NENA - June 14-19, 2019 - Orlando, FL**

**BYNET Tech Expo - June 16-19, 2019 - Tel Aviv**

---
